

Sustainable Rural Regeneration Program (SRRP)

Macadamia do Planalto - Northern and Central Mozambique

MDP presents SRRP as a practical rural development platform focused on agricultural production, agro-industrialisation, smallholder integration and resilient local value chains.

Program pillars

Agro-industrialisation	Farm-level production connected to local processing and market access.
Smallholder integration	Structured pathways for producers, cooperatives and rural families to participate in commercial value chains.
Import substitution	Priority crops and processing systems aligned with domestic food demand and regional supply gaps.
Seed systems	Improved access to adapted planting material and production knowledge.
Technology transfer	Mechanisation, precision agriculture and practical field training for scalable production.
Cooperative development	Organised producer groups that can aggregate supply, improve quality and access finance.

Geographic focus

Maniamba and Mepica in Niassa Province, and Novanana in Zambezia Province, with crop platforms including macadamia, cashew, rice, beans, sesame and maize.
